The program is Free to JOIN

Aims and Scope

Purpose of this program is to deepen our collaboration and network between partner universities in East Asia Region, including the Southeast Asia. Midst of the pandemic, we canceled many exchange programs for students and faculty staff after April 2020. On the other hand, we developed the online lecture, virtual site visit and other education tools using Zoom, Skype, MS Teams etc. Using these platform, we can gather without much stress.

Graduate School of Agriculture, Kyoto University organizes this Winter Exchange Program using Zoom and YouTube platforms. We would like to provide around 10 online-lectures and 8 virtual site visits. Topics cover most of field we study in our graduate school. (see page 1)

Kyoto University students are preparing students exchange program including the virtual sight-seeing and online social activities.

Courses

Due to the technical issue, we set two courses,
Full Attendance course and
Partial Attendance course.

- **Full Attendance Students** are requested to attend all programs including group work and Final Workshop which will discuss on the collaboration in East Asia for food, life, Environment & Sustainable Development.
- **Partial Attendance Students** can choose lectures, virtual site visits, and student exchange program, in a la carte style.

Certificate

The program is non-credit program. All students can receive one of the program completion certificates depending on the course joined.

Application

The application to the program is managed by the coordinator of partner university or partner faculty. Please contact to the coordinator appeared on Page 1 of this flyer.
